WALL MOUNTED HEATERS

ABOUT US

Based in Houston, Texas, eheat, Inc. is a leading US manufacturer of wall mounted electric panel heaters. Since 2002, we've been pioneers in introducing innovative heating solutions to North America. Our commitment to providing safe, energy-saving products and exceptional customer service sets us apart.

Our journey began with a dream of success in America, overcoming challenges to create the American-made envi heater. Today, we continue to fulfill our mission of being a premier manufacturer of electrical heating products.

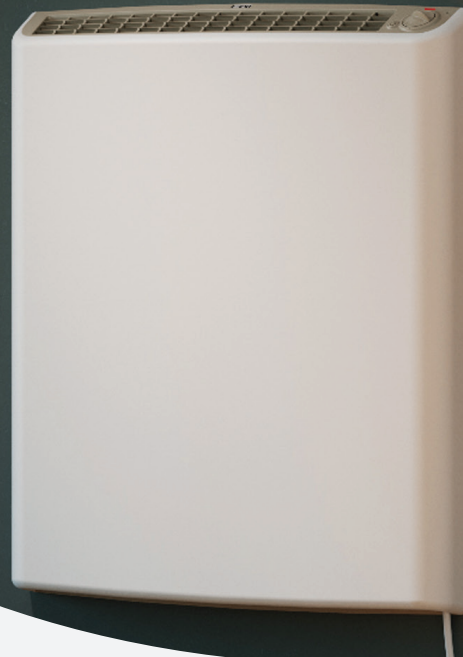

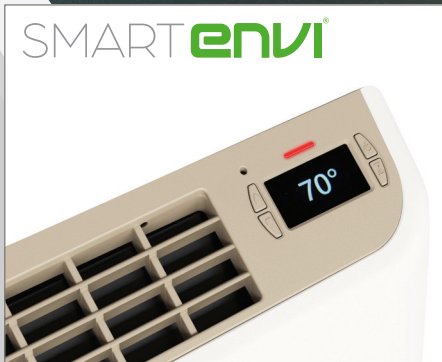

With a focus on quality and innovation, we introduced the envi heater in 2010, revolutionizing the industry with its pure convection technology. Manufactured in the USA, the envi heater boasts superior performance and safety features compared to traditional models.

Over the years, we've expanded our product line, including the EnviMAX and Smart Envi series, offering advanced features for larger rooms and smart home integration.

Looking ahead, we're excited about the future and our commitment to ongoing innovation, with plans for new and exciting products on the horizon. Join us as we continue to redefine comfort and efficiency in the home comfort industry.

✔ SMART

The Smart Envi has a digital thermostat and a proprietary app to control one or multiple heaters. Control the temperature, set schedules, and geofence, which uses your location to set the temperature. Many more advanced features, like child lock, freeze protect and zone heating makes the Smart Envi, the smart choice.

✔ ENERGY SAVINGS

Low wattage design combined with superior, patented, fanless, heat-circulation technology (Stack Convection Technology™) provides heating bill savings of up to 50% or more as confirmed and documented by customers.

✔ SAFETY

We believe that the envi heater is the safest wall mounted space heater in the world, and was designed from the ground up with customer safety in mind. Features include: low surface temperature (90°F), wall- sens™ (power cut off), enhanced TCO, safely enclosed low temperature elements, no fan etc.

✔ HEATING PERFORMANCE

The EnviMax is a 1000watt heater designed to heat approximately 350 square feet. For even larger areas, multiple heaters can be used.

✔ SIMPLE

Installation is very easy, just screw in two wall clips and its done! Hardwired heaters come with multiple knockout hole locations, protective gromet and pigtail wiring.

✔ HARDWIRED FOR PERMANENT INSTALLATION

The hardwired envi heater is approved as a permanently installed heater per the requirements of municipal, government other jurisdictions. This is not the case with other brands of plug-in heaters.

✔ WARRANTY & SPARE PARTS

The envi heater is extremely reliable because it has no moving parts and has a very low operating temperature. Each heater is supplied with an industry leading 3 year warranty. Envi heaters are manufactured in the USA and we carry a large supply of spare parts.

✔ CUSTOMER SERVICE

Our USA Made envi heaters are backed by our outstanding support team who are consistently described as A+ with our no-nonsense approach and 100% commitment to customer satisfaction. To this end we have been consistently awarded the highest BBB ranking available (A+) since our inception in 2002.

HOW IT WORKS

The Envi Heater's innovative dual-stack design was born out of years of research and development. The results revealed that the most effective way to heat a room with the least amount of energy is by heating the air in a room using 100% natural convection.

The Envi Heater's inner chambers feature simulated "stacks" of varying height, which boost airflow through the unit to maximize heat transfer. The end result of this technology is enhanced airflow and safe air temperature, all without the use of a fan!

ENVI – THE REVOLUTIONARY TRUE SMART ZONE HEATING

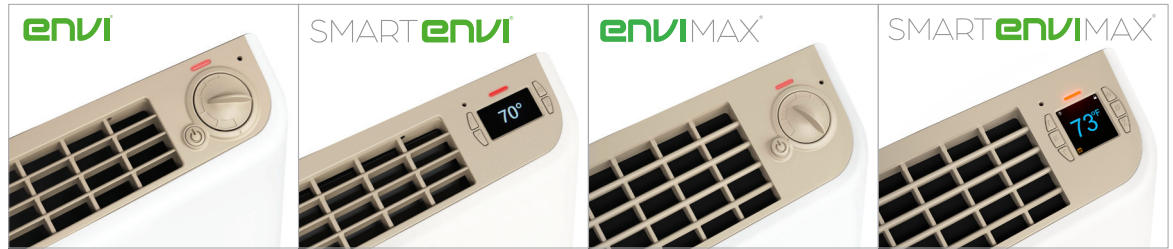

Traditional central heating relies on one thermostat that measures temperature from your hallway, lounge or wherever else it sits in your house. Heat is then distributed unevenly across your home, and as a result some rooms become way too hot, and some too cold! Whether you need just one heater, or a whole housefull, Envi offers a game-changing alternative to this outdated, inefficient and expensive heating of the past. Stop wasting money heating rooms you're not using and start saving money with the Envi heating solution!

Envi heaters are a zone heating solution and are revolutionary, smart approach to heating homes and businesses affordably. Warm each individual room to exactly how you like it and make thermostat wars a thing of the past.
