THE PERFECT LOW COST – HIGH EFFICIENCY HEATING SOLUTION FOR HOMES AND COMMERICAL LODGINGS

ENERGY SAVINGS

Low wattage design combined with superior, patented, fanless, heat-circulation technology (Stack Convection Technology™) provides heating bill savings of up to 50% or more as confirmed and documented by customers.

SAFETY

We believe that the envi heater is the safest wall mounted space heater in the world, and was designed from the ground up with customer safety in mind. Features include: low surface temperature (90°F), wall- sens™ (power cut off), enhanced TCO, safely enclosed low temperature elements, no fan etc.

HEATING PERFORMANCE

The EnviMax is a 1000watt heater designed to heat approximately 350 square feet. For even larger areas, multiple heaters can be used.

SIMPLE

Installation is very easy, just screw in two wall clips and its done! Hardwired heaters come with multiple knockout hole locations, protective gromet and pigtail wiring.
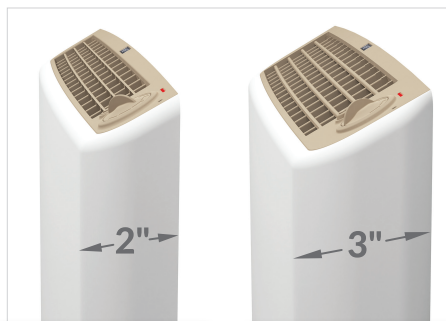

HARDWIRED FOR PERMANENT INSTALLATION

The hardwired envi heater is approved as a permanently installed heater per the requirements of municipal, government other jurisdictions. This is not the case with other brands of plug-in heaters.

WARRANTY & SPARE PARTS

The envi heater is extremely reliable because it has no moving parts and has a very low operating temperature. Each heater is supplied with an industry leading 3 year warranty. Envi heaters are manufactured in the USA and we carry a large supply of spare parts.

CUSTOMER SERVICE

Our USA Made envi heaters are backed by our outstanding support team who are consistently described as A+ with our no-nonsense approach and 100% commitment to customer satisfaction. To this end we have been consistently awarded the highest BBB ranking available (A+) since our inception in 2002.
